Sample Quiz \#1 Name: $\qquad$ Lab Section: $\qquad$
Answers

1. Calculate these expressions. Include the correct number of significant figures and units in the answer. (4 points)

## $1.8 \mathrm{~g} / \mathrm{cm}^{3}$

### 1.79 mL

2. Convert $892.0^{\circ} \mathrm{C}$ to ${ }^{\circ} \mathrm{F}$. (4 points)
$1637.6^{\circ}$ F
3. Density Problem (8 points)
a. Calculate the density of "substance A" when its mass $=11.22 \mathrm{~g}$ and its volume is $0.244 \mathrm{~cm}^{3}$. Express the density in units of $g$ / mm ${ }^{3}$.

## $4.60 \times 10^{-2} \mathrm{~g} / \mathrm{mm}^{3}$

b. It costs 10.79 cents to make $11.4 \mathrm{~cm}^{3}$ of "substance A". Calculate how much it would cost to make 8.91 pounds of "substance A" in units of \$. (1 pound $=453.59237 \mathrm{~g} ; 100$ cents $=1 \$$ )
$\mathbf{\$ 0 . 8 3 2}$
4. Differentiate between chemical and physical properties. Give at least one example of each. (4 points)
chemical properties change the relationship with atoms on an atomic scale and are generally irreversible. (reactions with other elements/compounds)
physical properties do not change the relationship within the atoms are can be reversible. (melting, boiling, magnetism)
